PROFESSIONAL SUMMARY

Business technology and commercial operations professional with 10+ years of experience spanning strategic account management, technical operations, enterprise systems, IT infrastructure, systems integration, BI/ETL, automation and technology-enabled process improvement. Bridges business, customer and technology needs by translating requirements into practical processes and coordinating internal teams, technology vendors and managed service providers.

Now expanding into cloud and AI, supported by AWS Certified Cloud Practitioner certification and a hands-on AWS portfolio platform deployed with S3, CloudFront, Route 53, ACM, IAM, AWS CLI, Linux/WSL2 and Git/GitHub.

TECHNICAL & PROFESSIONAL SKILLS

Cloud & Infrastructure: AWS architecture fundamentals, S3, CloudFront, Route 53, ACM, IAM, HTTPS/TLS, cloud security, cost-aware design

Cloud Tools & Development: AWS CLI, Linux/WSL2, Git/GitHub, Python fundamentals, cloud deployment, AWS Budgets

Systems & Integration: Enterprise systems, IT operations, EDI, VoIP, infrastructure modernisation, vendor/MSP coordination

Data & Automation: QlikView, Power Pivot, Power Automate, BI/ETL, sales reporting, workflow automation

Commercial & Business Operations: Strategic accounts, national retail, SADC, proposals, pricing coordination, sales administration, retail service

AI & Productivity: Generative AI fundamentals, responsible AI concepts, AI-enabled productivity tools, business process improvement

SELECTED CLOUD PROJECT

AWS Cloud Portfolio Platform

Live project shannonmorganfreeman.co.za | Repository [GitHub](#)

Built a public portfolio platform to create a professional, low-maintenance way to present cloud learning and project work, while applying practical security and cost controls.

- Configured Amazon S3 as a private origin with Block Public Access and SSE-S3 encryption; CloudFront uses Origin Access Control and signed origin requests.
- Connected Route 53 DNS and ACM DNS validation to serve the site over HTTPS, with TLS 1.3 support at the edge.
- Separated IAM access, enabled MFA, and used AWS Sign-In temporary credentials with AWS CLI from Linux/WSL2.
- Set an AWS Budget and kept the architecture cost-conscious; documented the build and maintained the source through Git/GitHub.

PROFESSIONAL EXPERIENCE

Diversicor

Key Account Manager & Technical Operations Lead | Aug 2016 - May 2026

- Joined as Assistant to the Sales Director and progressed into a broader commercial, key-account and technical operations function.
- Acted as a bridge between commercial requirements, operational teams and technology, coordinating systems, vendors and process changes across the business.
- Managed high-value commercial relationships across national retail, SADC, specialist and online marketplace environments, aligning customer needs with internal delivery.
- Coordinated commercial operations including business requirements, proposals, promotions, pricing coordination and execution across sales administration and retail service.

- Coordinated technology vendors and managed service providers on cloud migration, legacy infrastructure modernisation, VoIP, EDI and day-to-day IT operations.
- Used QlikView, Power Pivot and Power Automate for reporting, analysis and workflow improvement; applied AI tools to support productivity.
- Handled technical escalations and translated technology issues into practical business processes and clear actions for customers and colleagues.

Xicon Holdings

Key Accounts Manager / Executive PA | 2014 - 2016

- Supported customer relationships and commercial account activity, coordinating design, production, procurement and installation workflows.
- Prepared proposals and presentations; coordinated suppliers and internal teams, and supported finance, administration and systems collaboration.

EARLIER EXPERIENCE

Administration, operations and customer coordination roles across retail distribution, debt counselling, pharmaceuticals and logistics (2006-2013).

- Supported order management, customer service, stock coordination, records administration and operational workflows.
- Worked with data and reporting processes, credit bureau reporting, documentation and cross-team follow-up.
- Built a broad foundation in service delivery, accuracy, process coordination and customer-facing operations.

CERTIFICATIONS & CURRENT STUDY

AWS Certified Cloud Practitioner | December 2025

AWS Certified AI Practitioner | In progress - exam planned within the next month

AWS Solutions Architect - Associate | In progress

CS50: Introduction to Computer Science - Harvard | In progress

CURRENT TECHNICAL DEVELOPMENT

AWS architecture | Generative AI fundamentals | AI services and responsible AI concepts | Linux | Python | AWS CLI | IAM and cloud security | Git/GitHub | Cloud deployment | Automation fundamentals

EDUCATION

Higher Certificate, Economics & Management Science | University of South Africa (UNISA) | 2019

Debt Counsellor Certificate | Damelin | 2013

National Senior Certificate | Damelin Eden College | 2007
